

MADELINE I. MCINTOSH | Software Engineer

mcmcintosh2k14@gmail.com | South Jersey Area | (856) 236-3400

[linkedin.com/in/msmaddymac](https://www.linkedin.com/in/msmaddymac) | github.com/MsMaddyMac

SKILLS

HTML | CSS | JavaScript | TypeScript | ReactJS | Redux | Gatsby | Node | Express | GraphQL APIs | REST APIs | NoSQL DBs | SQLite | PostgreSQL | GraphQL | Apollo | Prisma | Hasura | AWS Lambda | Amplify CLI | IAM | AppSync | S3 Bucket | RDB | Strapi CMS | Prismic CMS | Docker | Trello | Jira | Asana | Notion | Figma | Material UI | Styled Components | Bootstrap | LESS | SASS | Jest | Heroku | Netlify | Render | Git | GitHub

RELEVANT PROFESSIONAL EXPERIENCE

Software Developer | Kale Ventures | Remote December 2020 - Present

- Ongoing maintenance and debugging of multiple web applications
- Implements site enhancements per client request

Software Engineer II & Accessibility Specialist | AdaptivApps | Remote January 2020 - October 2020

- Developed accessible applications for ease of use by individuals with physical & visual impairments
 - Tested and implemented solutions for accessibility barriers in accordance with WCAG 2.0 standards
 - Led two teams over 4 months through 4 product releases
-

PROJECTS

Software Developer | [Power Engineers](#)

A web application designed for an employee-owned engineering and environmental consulting firm.

Gatsby | GraphQL | Prismic CMS

- Refactored a 622 page Gatsby site with Prismic CMS to utilize updated Prismic CMS plugin to enable unpublished document previews
- Ongoing maintenance and new feature implementations

Software Engineer II | Angel City Sports

An accessible events management application with user social media-like timeline.

Gatsby | ReactJS | Reach Router | Hasura | GraphQL | AuthO | Apollo | Chakra UI | S3 Bucket | MinIO | EC2 | RDB

- Implemented Reach Router to assist in creating a WCAG compliant application for annual Paralympic games
- Created social media-like timeline allowing CRUD for posting and commenting between users
- Constructed admin dashboard for event management with CMS capabilities

Full Stack Software Engineer | The Ray

A web application to display emissions data on kiosks.

ReactJS | AWS Amplify | AWS Lambda | AWS AppSync | IAM | DynamoDB | GraphQL

- Developed a web application to display greenhouse gas emissions data to inform of positive effects on the U.S.
 - Created AWS Lambda functions to retrieve data from third party APIs to store in serverless GraphQL API
-

EDUCATION

Lambda School | Full Stack Web Development - HIRED EARLY | Remote

September 2019 - April 2020

- Fully immersive technical online training
- Software Engineering
- Web Development

STCC | Associate's Degree | Dean's List | Springfield, MA

September 2004 - May 2009

- Major in General Studies/Liberal Arts
 - Concentration in Accounting
-
